The Questar Standard 3.5 has long been regarded as the finest personal telescope in the world. In addition to the telescope's legendary resolution, flatness of field and contrast, the Standard has integrated features that are unavailable with other telescopes.

The control box has two (2) viewing ports with flick knob selection. It provides three power changes per eyepiece, an internal finder and two telescopic powers. Included also are a star-diagonal prism, solar filter for finder lens, off-axis glass solar filter, and focusable eyepiece diopter. The barrel rotates for viewing height adjustment and is silk-screened with a functional Moon Map. The removable dewcap is a Star Chart. The equatorial fork mount is brushed cast aluminum, aircraft polyurethane painted, with friction drive alt-azimuth controls. It includes an AC powered synchronous clock drive motor and declination clamp. The setting circle for Right Ascension and Declination is fully functional. The RA circle is universal for northern and southern hemispheres.

The Standard stores in a carrying case that has pockets for the included tabletop legs, extra eyepiece, solar filter and AC adapter cord, as well as a pocket for the optional Powerguide Controller.

**TYPE:**  Maksutov Cassegrain Catadioptric. No coma, astigmatism or spherical aberrations.

**CLEAR APERTURE:** 3.5 inches, 89mm (Center Obscuration, 27.9mm)

**FOCAL LENGTH:**
- Basic Visual 50.5 inches, f/14.4, 1300mm
- Camera close, 56 inches, f/16, 1400 mm
- Camera with Ext. Tubes, 64 inches, f/18, 1600mm

**FINDER LENS:**
- 4" FL., 4x and 8x, Field 12° and 8°
- 4x, 4.5°

**POWERS:**
- Powers are eyepiece dependent and can range from 40x to 270x with Questar Brandon eyepieces
- Resolves 1 sec. Arc at 50 feet EFL
- Photographic model, 1°30min, visual field of view 1.1° to .16°

**LENS:** BK7, MgFL2 coated, passes UV to 3300 A, IR to 1 micron, parfocal

**MIRROR:** F2, Pyrex®, Zerodur® or Quartz. AlSiO coated 3.800° dia. (All Questars for UV or IR on special order)

**SPECIAL COATINGS:** On special order, broad-band dielectric coating applied to the mirror, which increases its reflectivity.

**EYEPIECES:** 24 mm Brandon, 45° ap. Field; 16 mm 4 lens Brandon, 45°Ap. Field, optional eyepieces of 8mm, 12mm, 32mm

**AMPLIFYING/BARLOW LENS:** Minus 43.9 mm FL

**ERECTING SYSTEM:** Star Diagonal type, 90° BK7, MgFL2 coated

**BARREL ASSEMBLY:** Barrel: forged aluminum, machined full length

**LENS CELL:** Aluminum 24S-T4, black anodized

**REAR CLOSURE PLATE:** Stainless steel CENTRAL TUBE - precision machining and alignment after assembly.

**DEWCAP:** Internally black-flocked Synthane seamless tube 1/32” thick, to which is bonded a pre-rolled aluminum sheet

**FOCUSING MECHANISM:** Mirror thimble, stainless steel sliding tube. Slides on stainless, fixed, light-baffle tube, with front-end insert tube of .010” wall thickness. Conical ss spring-loaded. Focus rod ss 303, ground shaft, 56 T.P.I. precision ground threads

**KNOBS:** Aluminum 24S-T4, corrosion-resistant, hand-turned on turret lathe, stainless steel shafts and levers

TURNTABLE OR LOWER FORK BASE: Sand casting same alloy, toolroom turned, jig-bored and precision reamed, aircraft polyurethane painted

LEGS: Aluminum 61 S-T3, centerless ground and threaded, anodized. Center leg adjustable. Butyl rubber tips

SYNCHRONOUS DRIVE MOTOR: R.P.M. 110V. 60 cycles, other cycles, voltages and direction of rotation available. Sealed, lubricated gear train, 2.7 watts

RIGHT ASCENSION GEAR: Bronze, 4" diameter, and 4" diameter teflon-facing bearing surfaces

SIDE ARMS, INNER FORK BRACKETS, CONTROL BOX: Die castings of corrosion-resistant aluminum alloy 13, toolroom turned, milled, jig-bored, tapped and reamed. Special painted aluminum and clear-urethane protected

FINDER MIRROR CAGE: Stainless steel, brushed satin finish

ALTITUDE OR DECLINATION CIRCLE: 3-15/16" diameter, 301 s.s., cemented and riveted to bracket ring assembly, 1° divisions with etched and filled markings

CLAMP: Bakelite padded s.s. stud clamps dec. circle to side arm

AZIMUTH OR R. A. CIRCLE: 6" diameter, anodized aluminum, silk-screened, graduated to 1° and 4 min of time. May be set as celestial clock. Manual slow-motion independent of drive

SLOW MOTIONS: Continuous 360° rotation, safety clutch held. Permits control to a few seconds of arc. Absolutely free of backlash, lag, or play. Ratio 31 to 1

DIMENSIONS: Height, upright, 14". With barrel horizontal, 11" high and long. Weight, 6.7 pounds

![Typical MTF for Questar 3½-inch](image)

**THEORETICAL MTF**
- Obscuration Ratio = 0.34

**MEASURED MTF**
- 5461 Å

**Typical MTF for Questar 3½-inch**

Typical Questar 3½ and Seven Modulation Transfer Function (MTF) as obtained with a shearing interferometer and expressed as a function of the shear parameter, S. To express the MTF as a function of the spatial frequency, R, in lines per millimeter, the following relationship can be used:

\[ R = \frac{SD}{2 \lambda f} \]

where S = shear parameter, \( \lambda \) = wavelength, f = focal length, and D = clear aperture.
